DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4, 5, 17 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Boylan et al. (5,926,384).

Boylan et al. disclose a synchronous rectifier controller to eliminate reverse current flow in DC/DC converter in Figs. 3 and 9. The loss free impedance (L1), filter capacitor (C1 and C2), transformer (310), electronic device (Q1-Q4), rectifier (Q5 and Q6), load connected to the output windings (secondary winding T1A), output capacitor (C0 and C3) and load (RL).

Allowable Subject Matter

3. Claims 6-16 and 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments with respect to claims 1, 2, 4, 5, 17 and 21 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
